

LUXURY BEAUTY SYSTEMS

LUMA

The complete identity system.

01 The Brand02 Logo System03 Colour04 Typography05 Elements & Voice06 Applications

01 — THE BRAND

Light, before colour.

In video engineering, Luma is the luminance signal — the pure brightness that carries an image before a single hue is added. It is the truest part of the picture.

LUMA brings that principle to the beauty industry: a clear, luminous operating system for salons, makeup artists and photographers — so the craft stays in the spotlight and the business runs in the background.

MISSION

To give beauty professionals software that feels as refined as the service they deliver.

Refined

Every detail considered, nothing loud.

Trusted

Dependable systems professionals rely on.

Luminous

Clarity that makes the work shine.

Exclusive

A premium feel, end to end.

02 — LOGO SYSTEM

Primary lockup — the preferred expression of the brand. Stacked, centred, with the luminance mark above the wordmark.

MISUSE — NEVER DO THIS

03 — COLOUR

USAGE BALANCE

Let darkness dominate. Gold is precious — used as a thin, intentional accent it reads as luxury; overused it reads as cheap. Keep roughly this ratio across every surface.
